How to use this wiki

- Formatting of wiki pages: **Minimize the use of bulleted lists** where possible.
- Instead use **headings** (H2 and smaller) as much as possible
- **Edit any page** to improve it. You do not need to ask for permission.
- Do not delete information that might be important (ask the author him/her first, i.e. via a comment where you tag him/her)
- Use **Bold text** where possible to **highlight important parts** of your text lines, to make them more scannable.
